

our Services

Our company has been a distributor of electronic parts since more than 10 Years. Our strong contacts with leading manufacturers are the basis of our continuous growth and the satisfaction of our customers. As a reliable distributor with an evident information lead, we have acquired an excellent reputation within the whole industry and amongst small and medium enterprises. Whether you would like us to carry out the day-to-day purchasing of your current requirements for electronic components or you would like the current market data included in your strategic scheduled orders: We are the right business partner for you.

Support choosing Components

In the **resistor technology** we distribute a wide range of different types from european and south asia manufacturers. We can offer **wirewound resistors** as well as **thickfilm resistors** in high and low ohmic value, precision high voltage, precision metal film, molded style, power resistors for high frequency and pulse loading applications. We have resistors aviable for every application from **3 Watt to 40000 Watt**. The passive components manufactured according customer specification and they are also aviable in small quantities. We can offer nearly all possible tolerances, temperature coefficients and ohmic value. Please do not hesitate to contact us should you have any technical requirements

Providing datasheets

In the range of **Opto-Electronic** and **Electromechanics** you will find nearly all data sheets of the products. The **pdf-format** specifications are part of our homepage and can be **download** for your information. Should one of the data sheets are not aviable, we can provide the specification from our database and send it via e-mail or telefax.

Logistic Service via DPD GeoPost

We are **successful independent distributor** for the electronic components and we need a reliable and fast logistic service. Therefore we have decided to use **DPD GeoPost** for our transportation service. With the **daily shipment** we reach the most important trade centers within Europe as well as individuel locations fast- efficient and reliable.
